Wader Size & Conversion Chart

EU / US / UK boot sizes with garment measurements for every wader and boot we make

1. **Start with the boot size**
   Match your usual EU size, or measure your foot length (heel to longest toe, standing) and read the cm column.
2. **Check the height fit**
   Chest and full-body waders cover your torso. Compare your height with the "Fits height" row before ordering.
3. **Layer for winter**
   If crews wear thick clothing underneath, order one size up. Bulk orders can mix sizes freely.

Boot Size Conversion

EU is the size stamped on every boot we ship. US and UK columns follow common work-boot sizing and may shift by half a size between brands - when in doubt, go by foot length.
